

FORKLIFT LASER GUIDE

The Forklift Laser Guide product from OEA Safeguard will help reduce product damage and minimize product loss by providing operators with a visual light when picking up and placing a load. It comes in your choice of either red or green lasers. The fork laser guide has a lithium battery which lasts up to 50 hours. It also comes with an on/off remote control to extend battery life. It's easy to install with magnets to allow you to place the unit in a visible but protective location. Competitively priced, the Forklift Laser Guide will save your company money and minimize product loss.

FORKLIFT LASER GUIDE
